

## **Some common concerns of communities interested in our healing program:**

### **1. What steps will you take to ensure the safety of all those participating in your Program?**

We have a consent form that ensures appropriate confidentiality measures are present which is signed by all participants prior to participation in any of our programs's Healing/Training workshops.

All staff and facilitators adhere to a Code of Conduct, Code of Ethics & Integrity and take an Oath of Confidentiality. All staff members and facilitators have criminal record checks. All staff members and facilitators are qualified with Psychology of Vision® healing/support methods.

If a participant in any one of our workshops becomes triggered or re-traumatized through the disclosure of sexual, physical, or mental abuse, our staff will immediately take measures to ground the participant and keep them centered in themselves. Any participant who may be entering process, or visiting, or re-visiting trauma is closely monitored by those staffing the workshop. Each staff member is trained to spot and identify any person who may be suffering. There are numerous signs that one who is trained will pick up on. In a case where this participant is “going down”, or entering an emotional territory that is new or may be harmful to them physically or mentally, they will be completely supported. This support can take the form of one on one attention during any traumatic moments. Staff will be there to offer themselves through physical contact (if the participant is willing to receive), emotional support, and most importantly love.

### **2. Why are you opening up these old issues in people?**

We have years of experience in seeing that these ‘old’ issues are constantly being acted out in the individuals and in their families if left unaddressed. The issues show up in self-destructive behaviours like alcohol and drug addictions, violence, abuse, authority issues, poor health as well as a lost vibrancy for life in general.

By supporting people to venture within and address these issues, normally we see improved health and less self destructive behaviour almost immediately. We are not doing anyone any favours by enabling them in their defensiveness or their denial. We tend to inherit their neurosis. Anything that gets handled or healed doesn't get passed on!
